

DRIVING LESSON SYLLABUS

Welcome

Welcome to driving lessons at The Next Street! We created this driving lesson syllabus to explain what to expect at each lesson and what to practice afterwards. This is only a guideline – new drivers master driving skills and gain confidence at different rates.

Each lesson is sold individually or as part of a package. Not all students will have 8 hours of lessons as part of their driver education program. You can buy as few or as many lessons as you need. We recommend 8 hours of lessons with a professional instructor for the average new driver, based on our expertise and understanding of how driving skills are mastered.

BEFORE LESSON ONE:

Prior to a student's first lesson with The Next Street, we recommend that the student have at least a basic understanding of a car and its controls. It's best if the student has driven in a parking lot or on secondary roads so that the student has some level of comfort and can absorb the training. If you do not have access to a vehicle, please let your instructor know at the first lesson so they can adjust the lesson plan accordingly. If you grew up driving tractors or ATVs then the first lesson may be a bit faster paced.

PLEASE NOTE:

Every new driver develops skills at different rates. Our instructors will do their best to cover as many skills as possible, however our main priority is making sure you have mastered the basics and you are safe and comfortable before we move on to advanced skills. Practicing at home in-between lessons for a sufficient amount of time is very important. If you do not have access to a vehicle to practice in, you may opt to purchase more lessons with us.
